## Mikrofon

Esimesel logol on kujutatud mikrofoni mille kaudu saab infot ja andmeid edasi viia väga paljude inimesteni. Oma kujundustes oleme välja pakkunud 5 erinevat värvilahendust. Osad nendest on mängulisemad ja julgemad, mõned tagasihoidlikumad. Mikrofoni alumisel osal on kujutatud tulpdiagrammi – kui andmete kogumit, mis läbi mikrofoni võimsuse viiakse edasi paljude kuulajateni.

Andmemull

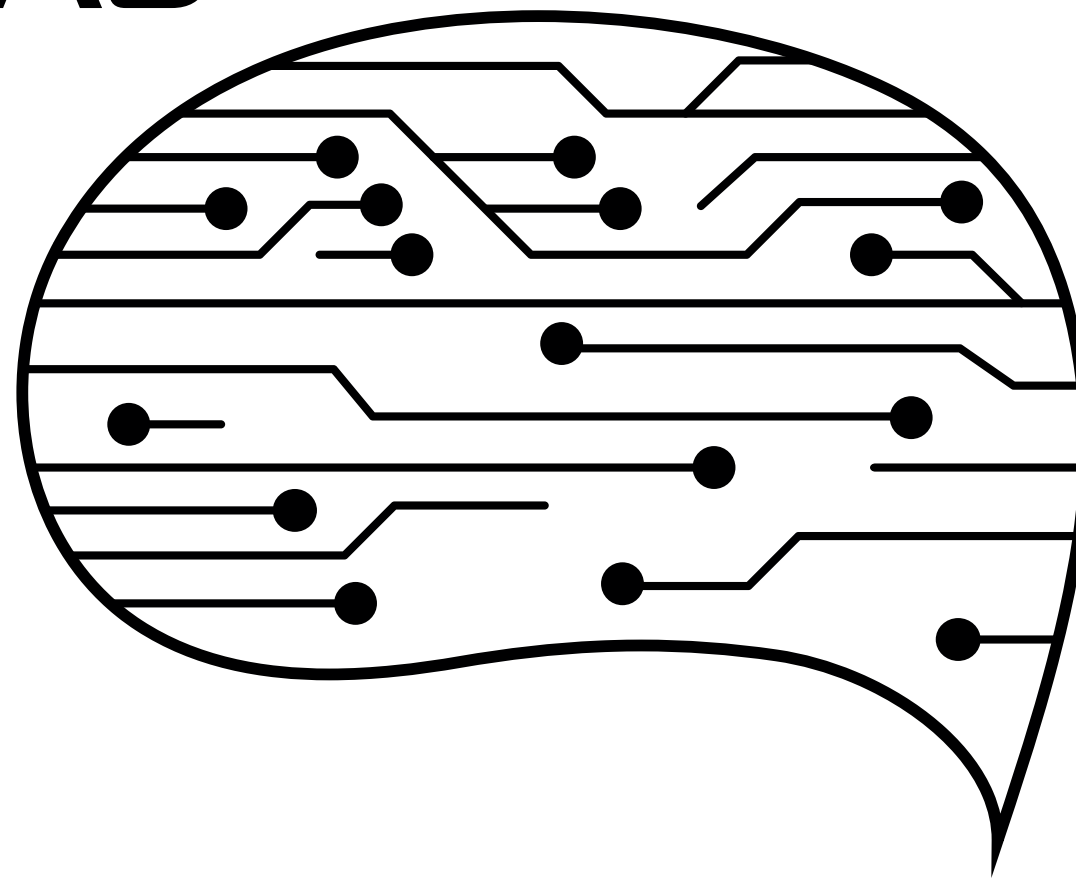

Teisel logol oleme kujutanud jutumulli, mille sisse on kogutud palju erinevaid andmeid.  
Siin saavad andmed omavahel kõnelda kui ka erinevaid kooslusi ja ühendusi moodustada.  
Kujundusi oleme loonud 5 erinevat, kahes eri värvikombinatsioonis.

Häälelained

Viimasel kavandil oleme kujundanud häälelained, mis kannavad edasi kuulnud helisid.  
Samas võib ka logolt näha erinevaid andmekogumeid, mis on rühmitatud erinevate teemade kaupa.
